

MagnaPrint® Reflective Clear

Ready to use reflective ink for bright shades

MagnaPrint® Reflective Clear is a ready to use water-based textile printing ink containing micro glass beads which reflect light.

MagnaPrint® Reflective Clear can be coloured with MagnaPrint® Eco Pigments and printed directly onto light coloured fabric or a underbase such as AquaPlas FF for dark fabrics.

Alternatively, it can be used as a final overprint on multicoloured designs.

Application

Printing is best undertaken using 24 - 43T (60 - 110) mesh screens with rectangular profile squeegees.

Print MagnaPrint® Reflective Clear as last colour to avoid pick up. After printing the garment/panel should be cured for 2 - 2½ minutes at 165°C (330°F).
